players being Maurice Vignaux and Jacob Schaefer. The characteristic points of the game were pervousness on the part of both players, and a fine rally toward the close by Schaefer after Vignaux, through extreme nervousness, failed to profit by two or three good opportunities to win. So nervous in-deed was he that he could not retain his seat while his opponent was playing, but moved excitedly about, while the perspiration stood out in great drops upon his forehead. Schaefer won the lead and chose the black bell, but failed to count the first stroke. He was followed by Viguaux with a run of 11.
Then Schaeler gathered 38 on his string.
Viguaux made 4 in his second, leaving the
balls in bad position, and Schaefer failed to count the first point. Special interest was centered on Vignaux in the fifth when, hav-ing conquered for the time his nervousness in previous innings, he ran 139. The game then stood: Schaefer, 79; Vignaux, 175. Schaefer

The house in Nelson Square, at Lymbeth, fiends, were arrested yesterday, has been placed under police surveillance. All per-sons entering are carefully scrutinized and notes taken of their personal appearance. The police hope in this way they may secure evidence on which to base further arrests, as they are convinced that numerous accom-plices of the men already in custody are at large. One evidence of this is the fact, just made public, that large sums of money, at regular intervals, have been deposited in the Bank of England to the credit of the men held in custody in Dublin for participation in the Phonix Park and other murders. The uthorities have made a vigorous search for the source of these deposits, but as yet have not been able to discover it.

—have hopped back again as it were—and in the channel is exactly where the United States engineers said they were going to put it, in spite of the assertion of that veracious pilot. This gives a wide and direct channel for steamers and tows and is in itself sufficient evidence of the soundness and practical cability of the place of the Commission, and a proof that the Mississippi river can be controlled at a reasonable cost.

In coming down last Monday the White would not make an effort to come through the chute, but fellowed the new channel

the chute, but followed the new channe down the Louisiana shore. She had aboard down the Louisiana shore. She had aboard 6000 bales, and passengers for Reserve Landing, but would not attempt to land there; and if she had made the effort would have certainly failed. Last season there was thirty five feet of water in front of Reserve thirty five feet of water in front of Reserve during the lowest stage, and now the river is at flood hight, and it is impossible for a large boat to effect a landing. These facts are too significant to need further elucidation. The success of the government works at Lake Providence is so signal that it goes without

DEDDING PLANTS of all descriptions; new Boses and Geraniums. Among them is Belle of Memphis, one of the best, introduced by H. Moore, florist. It is one of my seedlings, which I have tested for the past three years. Now I see, to my great surprise, that some other florist claims to have raised this Belle of Memphis, but I believe that such a man could raise a cabbage-head much tester when it is cooked. All three plants, as any others, I sell at lowest rates. My stock is large and good. I can offer nearly 100,000 plants for slightings of bedding, and I wish that my friends and customers would give me a trial.
